SUMMARY

Computer Engineer (TEC, 2019) specialized in React interfaces and interactive 3D/WebGL experiences. 4+ years building responsive UIs, reusable components, and immersive experiences (web VR, real-time interactive avatars). Currently at Opal Interactive, building the interface for an AI avatar and kiosk/AR apps for studio clients. Careful about performance and visual consistency across browsers and devices.

SKILLS

Frontend

React · Next.js · Astro · HTML · CSS · TypeScript · JavaScript

Graphics / 3D

Three.js · WebGL · A-Frame.js (web VR) · Shaders (Shader Graph)

UI / UX

Responsive design · Reusable components · Basic accessibility · Performance optimization

Tooling

Vite · Git/GitHub · Vitest · ESLint / Prettier

WORK EXPERIENCE

Full-Stack Developer (Frontend-focused) — Opal Interactive

Apr 2026 — Present

Studio that takes on projects from various companies and distributes them across its dev team

- Opal Web Avatar: React 19 interface for an interactive AI avatar with lipsync and webcam gaze tracking.
- totempanadol: interface for a Unity kiosk/AR app with thermal camera and face detection.
- Web interface for HealthSim, a Unity XR training simulator.

React / Frontend Developer — Freelance — independent projects

2021 — Present

Multiple clients and projects

- Solucom — Remote Gate Access (2023): IoT access-control system with a Raspberry Pi (Python) as the physical controller, Vue.js frontend, and Laravel/PHP backend, synced over an API with a password database.
- Built multiple applications and components with React: clean architecture, reusable components, responsive design.
- Implemented UI features, API integrations, bug fixes, and performance improvements under tight deadlines.

Full-Stack Developer, Frontend-focused (Jr/Mid) — IMMERSO

Apr 2021 — Jan 2023

- Built and maintained frontends with React.js and Next.js connected to Django backends.
- Built interactive web VR experiences with A-Frame.js: visual editors, maps, and database-driven content.

Full-Stack Developer, Frontend/VR-focused (Jr/Mid) — WOW Emotions

Jan 2022 — Feb 2023

- Built the interface for a VR website for the 'Doit' reconstruction project.
- Designed and built 'Giz': an immersive nature experience with 5+ VR levels.
- Design consistency and optimized performance across devices and browsers.

Full-Stack Developer (Jr) — SolvoSoft Aug 2020 — Feb 2021

- Optimized web features with JavaScript on legacy systems.
- Improved UI performance and responsiveness.

INDEPENDENT PROJECTS

NewsPulse — personal product — newspulse.dev Jun 2026 — Present

High-performance static frontend

- Site built with Astro + Tailwind CSS, optimized for fast loads and SEO, with content in 4 languages.
- Continuous deployment to Vercel triggered by every automated content publish.

Tinted Showdown / Cannons — personal games — published on WebGL 2025 — Present

Real-time UI and interaction in-browser

- Multiplayer game interfaces (color selection, code-based rooms, HUD) running inside published WebGL builds.

FeedBack Figuras 3D — personal product 2025 — Present

Next.js 15 · React 19

- Animated star-rating interface (Framer Motion), drag & drop photo upload, light/dark theme, responsive design.
